

Planting for birds

Native Trees for Kereru (Pigeon) Food

During the breeding season (July–February) the home range of Kereru can be 4-5 hectares or even smaller if there is sufficient food. During the non-breeding season Kereru will fly several kilometers for different foods. These tree fruiting times are a guide only and may differ slightly in your area.

Native Trees for Tui and Silver Eye Food

During their breeding season (September-January) tui have a home range of 4-5 hectares, but at other times will fly up to 50 kilometres in search of food. Silvereye have a breeding season home range of just one hectare but at other times will typically travel up to 10 kilometres for food. These tree fruiting times are a guide only and may differ slightly in your area.

| Plant Height | Plants to 6 metres | Plants to 6-8 metres | Plants to 9-12 metres |
